

2027 ENTRY

The UK T Level University Guide

633 courses at 111 universities, read off official admissions pages
one at a time. Free, no signup, no ads.

What is in this guide

Each page answers one question. The six subject pages are the ones most students need, and every one of them carries a QR code into the live directory.

Nobody publishes a straight answer	3
Who compiled this data, and how it was checked

Nobody publishes a straight answer

111 universities

checked by hand, one course page at a time. Nothing here is scraped, estimated or copied from another directory.

In September 2025 I was a T Level Digital student trying to work out which universities would take my qualification. Course pages contradicted prospectuses, admissions teams gave different answers to the same question, and plenty of universities did not mention T Levels anywhere.

The official list was just that: a list of universities. No grades, no courses, no pathway, nothing a student could act on.

So I checked more than 40 universities by hand and wrote down what each one actually said. Those notes are now 633 courses, and I am still the person checking them.

This guide is a printable snapshot of that work for careers teams and students. The live directory is always more current, and it is the version to trust if the two ever differ.

Tobi Salawu, founder, TLevelled

Three checks before you apply

Course, not university

One degree at a university can welcome your T Level while another at the same university refuses it. Acceptance is never institution-wide.

1. Find the subject page for your T Level

Pages 6 to 11 cover the six subjects we track. Each one shows how many universities accept it, what grade they typically ask for and how many Russell Group routes exist.

2. Scan the QR code for your actual shortlist

Every subject page carries a QR into the live directory, filtered to that subject. That is where the university names, course names, exact grades and links to the official source pages live.

3. Confirm on the university's own page before applying

Universities update entry requirements every admissions cycle. Every listing links to the official page it was taken from, so the confirmation is one click. If a course is missing, either it has not been checked yet or its university publishes no T Level route. Neither means it refuses T Levels.

What a T Level grade is worth

1 T Level = 3 A Levels

in both size and UCAS tariff. The overall grade is what the points are based on.

Your overall grade combines the core component, graded A* to E, with the occupational specialism, graded Pass, Merit or Distinction. The two combine into one overall grade, and that is what converts to tariff points.

OVERALL T LEVEL GRADE	UCAS POINTS	A LEVEL EQUIVALENT
Distinction*	168	A*A*A*
Distinction	144	AAA
Merit	120	BBB
Pass (C or above on the core)	96	CCC
Pass (D or E on the core)	72	DDD

The tariff is fixed. The offer is not. Some courses state a T Level grade, others state a UCAS points total, and the two do not always line up: a course that accepts a Pass may still ask for a points total above the tariff for a Pass. The only reliable answer is the one on the course page.

Where a university publishes no grade at all, this guide records it as case-by-case rather than guessing one from UCAS points. A grade is never inferred.

T Level Digital

Computer science, software engineering, cyber security and data science.

74 universities

accept T Level Digital on at least one course we track. Acceptance is course by course, never blanket, so always check the exact course.

108

courses tracked

11

Russell Group universities

88%

of graded courses ask for Merit or above (56 of 64)

2

foundation year routes

What the 102 accepting courses ask for

T Levels that count for this subject

Digital Software Development (formerly Digital Production, Design and Development)

Digital Data Analytics (formerly Digital Business Services)

Digital Support and Security (formerly Digital Support Services)

Scan for every Digital course, with grades and sources

What to check before applying. Digital has the most published refusals of any subject: 6 courses say no outright, including Computer Science at universities that accept Digital elsewhere in their catalogue. Acceptance is decided course by course, so never read one offer as a university-wide policy.

T Level Engineering

Mechanical, electrical and manufacturing engineering, plus engineering foundation years.

52 universities

accept T Level Engineering on at least one course we track. Acceptance is course by course, never blanket, so always check the exact course.

98

courses tracked

10

Russell Group universities

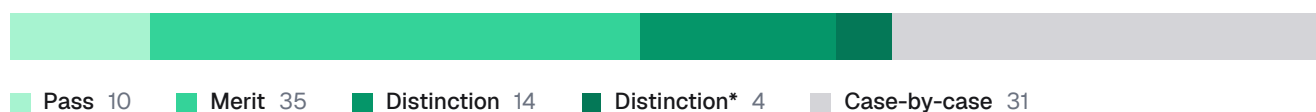

84%

of graded courses ask for Merit or above (53 of 63)

21

foundation year routes

What the 94 accepting courses ask for

T Levels that count for this subject

Design and Development for Engineering and Manufacturing

Engineering, Manufacturing, Processing and Control

Maintenance, Installation and Repair for Engineering and Manufacturing

Scan for every Engineering course, with grades and sources

What to check before applying. Two things separate the routes here. Many direct-entry courses require A Level Maths alongside the T Level, while only 2 of the 21 foundation-year routes tracked ask for an A Level alongside it. And 31 courses publish no grade at all, so the Merit figure above is worked out over the 63 that do.

T Level Health

Nursing, midwifery, paramedic science and the allied health professions.

67 universities

accept T Level Health on at least one course we track. Acceptance is course by course, never blanket, so always check the exact course.

130

courses tracked

12

Russell Group universities

88%

of graded courses ask for Merit or above (79 of 90)

0

foundation year routes

What the 127 accepting courses ask for

T Levels that count for this subject

Health

Healthcare Science

Science

Scan for every Health course, with grades and sources

What to check before applying. Most Health courses name the occupational specialism they accept, not just the overall grade. Nursing and Midwifery degrees usually want the matching specialism, and therapy degrees usually want Supporting the Therapy Teams. A student with the right grade in the wrong specialism can still be turned down.

T Level Accounting & Finance

Accounting, finance, business management and economics.

55 universities

accept T Level Accounting & Finance on at least one course we track. Acceptance is course by course, never blanket, so always check the exact course.

83

courses tracked

8

Russell Group universities

91%

of graded courses ask for Merit or above (51 of 56)

1

foundation year route

What the 79 accepting courses ask for

T Levels that count for this subject

Accounting

Finance (last enrolments September 2026)

Scan for every Accounting & Finance course, with grades and sources

What to check before applying. 17 of these courses publish a UCAS points total instead of a T Level grade. This guide records those as case-by-case rather than converting points into a grade, so check the points threshold on the course page: a course that accepts a Pass may still ask for more points than a Pass carries.

T Level Education & Early Years

Primary education, early childhood studies and education studies.

85 universities

accept T Level Education & Early Years on at least one course we track. Acceptance is course by course, never blanket, so always check the exact course.

89

courses tracked

10

Russell Group universities

73%

of graded courses ask for Merit or above (40 of 55)

2

foundation year routes

What the 89 accepting courses ask for

T Levels that count for this subject

Education and Early Years

Education and Childcare

Scan for every Education & Early Years course, with grades and sources

What to check before applying. Education has the widest university coverage of any subject. It also has the highest share of courses that assess each application individually: 34 of 89 publish no grade floor. For a student whose predicted grades fall short elsewhere, this is where the real options are.

T Level Legal Services

Law, criminology and the other degrees that name the Legal Services T Level.

66 universities

accept T Level Legal Services on at least one course we track. Acceptance is course by course, never blanket, so always check the exact course.

125

courses tracked

10

Russell Group universities

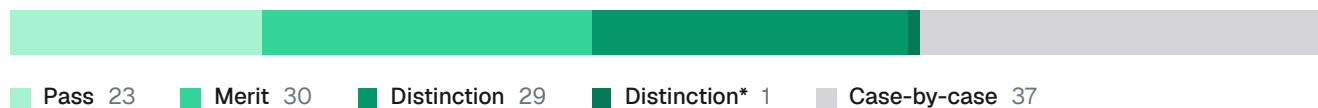

72%

of graded courses ask for Merit or above (60 of 83)

32

foundation year routes

What the 120 accepting courses ask for

T Levels that count for this subject

Legal Services

Scan for every Legal Services course, with grades and sources

What to check before applying. 5 courses refuse T Levels outright, all at Russell Group universities, so check the exact course before relying on a university's other offers.

19 of 24 accept a T Level

100 courses

across 19 Russell Group universities accept a T Level on at least one route. 2 publish an explicit refusal, and 3 have not been checked yet.

This is the question careers teams get asked most, so it is worth being precise about it. Acceptance here is course-specific, and at several of these universities the route in is a foundation year rather than direct entry to year one.

Accept a T Level (19)

University of Birmingham

University of Bristol

University of Cambridge

Cardiff University

Durham University

University of Exeter

King's College London

University of Leeds

University of Liverpool

London School of
Economics

University of Manchester

Newcastle University

University of Nottingham

Queen Mary University of
London

University of Sheffield

University of Southampton

University College London

University of Warwick

University of York

Publish a refusal (2)

Imperial College London

University of Oxford

Not yet checked (3)

University of Edinburgh

University of Glasgow

Queen's University Belfast

The three unchecked universities publish no clear T Level statement on the admissions pages checked so far. That is recorded as unknown, not as a refusal. Silence is not a rejection, and this guide does not convert one into the other.

For students and careers teams

My certificate says Education and Childcare, not Education and Early Years.

Same thing?

Yes. Education and Childcare is the older title for the same T Level. Universities publish both, so search for both when checking a specific course.

A university is not in the guide. Does that mean it refuses T Levels?

No. Either that course has not been checked yet, or the university publishes no T Level route on the pages we checked. A refusal is only ever recorded when the university publishes one, and those are named explicitly.

What if a student is predicted a grade below the one published?

The published grade is a minimum, and admissions teams do read the whole application, so a one-band gap can sometimes be closed. Nobody guarantees it. Email the admissions team directly, and put case-by-case courses and foundation-year routes on the rest of the list so there are offers the student comfortably meets.

How current is this?

Every requirement in this edition was checked in October 2026. Universities publish 2027 requirements between August and October, so confirm on the official course page before applying.

For careers teams

This guide is free to print, copy and hand out, and it needs no licence or attribution. The live directory is free too, with no signup and no ads. If a requirement here is wrong, email the university and course to hello@tlevelled.co.uk and it gets rechecked against the source and corrected, usually the same week.

FIND YOUR COURSE

The full course list is one scan away

Search by subject, filter by the grade a student is predicted, and open the official source page behind every requirement. Free, no signup, 633 courses.
